Subject: HB 4561 Concerns.

Dear Sir,

I know your time is limited so I will be brief, I am urging you to **not** support House Bill 4561 to modify the codes adoption to a 6 year cycle. I have been in the electrical industry for 45 years and believe Michigan would not gain in any positive way if this were to become law. Michigan businesses would only fall behind in safety, competitiveness, and have added expenses if this house bill becomes law.

It is important to businesses in Michigan that they be doing construction, modifications, or alterations to the most current codes to allow the people of Michigan to benefit by use of the most current technology, materials, and construction methods.

I thanks you for your time and again urge you **not** to support this House Bill.

Respectfully,

Darrick Whitaker
